## Errors

This section shows site quality issues, including broken links and server mis-configurations.

### Priority 1

2 issues on 2 pages

- This link is broken. The page could not be found on the target web server.

Fixing this depends on how the link became broken:

- The link has been mistyped and should be fixed
- The destination page has moved and the link should be updated
- The destination page no longer exists and the link should be removed
- A file has been accidentally deleted and should be replaced

## Accessibility

This section shows accessibility issues, indicating problems for older users, people with disabilities or accessibility needs. Automated testing cannot detect all accessibility issues, so should be used alongside human testing.

### Level AA

1 issues on 1 pages

- The CSS outline or border style on this element makes it difficult or impossible to see the dotted link focus outline.

Change the style to avoid obscuring the focus outline around focusable elements.

- Chrome (obscures the focus indicator on links, buttons, dropdowns and range controls)
- Firefox (obscures the focus indicator on links)
- Internet Explorer (obscures the focus indicator on links, buttons and range controls)Internet Explorer does not support the `outline-offset:` property, so using this does not reliably avoid focus outline overlap.

## Search

This section shows search engine guideline violations, and pages that don't comply with search optimization best practices.

### Priority 1

2 issues on 1 pages

- Offer an HTML site map to your users with links that point to the important parts of your site. Links embedded in menus, list boxes, and similar elements are not accessible to web crawlers unless they appear in your site map. If the site map is larger than 100 or so links, you may want to break the site map into separate pages.

- This page has no `h1` element, which violates Bing webmaster guidelines. Add an `h1` element just before the main content describing the page.

### Priority 3

1 issues on 1 pages

- No meta description tag found. Use a description tag that accurately describes the contents of a web page.

A well-written meta description attracts more clicks in search results than an irrelevant or missing description.

## Informative

These messages are for information only and do not indicate errors.

- No search keywords are set in SortSite, so no keyword optimization rules have been run.  
If you want to check keyword optimization, set the keywords using the Scan Options command.

## Usability

This section shows general usability issues, indicating navigation problems for all users.

### Priority 2

3 issues on 2 pages

- Avoid underlined text - people will click on it and think it's a broken link.  
Use something other than underlining for highlighting text, because it looks like a link, and users become frustrated when the "link" does not work.  
[Usability.gov 10:4](#)  
<https://hcqateam.expertflow.com/agent-gadget/assets/styles/materialize.min.css> line 549
- Do not create or direct users into pages that have no navigational options. No links out of these pages found.  
Many web pages contain links that open new browser windows. When these browser windows open, the Back button is disabled, and if the new window opens full-screen, users may not realize that a new window has appeared, and become frustrated because they cannot press Back. Popup windows should contain a prominent control that closes the window.  
[Usability.gov 7:1](#)  
<https://hcqateam.expertflow.com/agent-gadget/> line 1
- Provide a search option on each page of content-rich web sites.  
A search option should be provided on all pages where it may be useful - users should not have to return to the homepage to conduct a search. Search engines can be helpful on content-rich web sites, but do not add value on other types of sites.  
[Usability.gov 17:4](#)  
<https://hcqateam.expertflow.com/agent-gadget/> line 1

### Priority 3

1 issues on 2 pages

🔴 Use at least a 12-point font on all web pages.

- `<p style="font-size: 11pt;" >`
- `<p style="font-size: 15px;" >`
- `<p style="font-size: small;" >`
- `<font size="2" >`
- `<font size="-1" >`
